AllowedIPs = 10.0.0.2

[Peer]
# phone-ben
PublicKey = Z3xK9cV2bN5mL1qW8eR4tY7uI0oP6aS3dF9gH2jJ5k=
AllowedIPs = 10.0.0.3

[Peer]
# site-b-branch-router
PublicKey = L5pQ3sX8cV1bN6mA0dJ9fH2gE8Kx1mQ7ZrR4vT9nY2w=
AllowedIPs = 10.0.0.4
```

## Security Notes

Private keys are never included in reports. Distribute peer configs over a secure channel; anyone with a config can join the tunnel. Preshared keys add a post-quantum resistance layer. Verify handshakes with 'wg show' after deployment.
